Tarun Anumol, Ph.D.,
Global Environment Market Manager, Agilent Technologies

 Tarun Anumol is the Global Environment Market Manager for Agilent Technologies.

Previously, he was an LC-MS applications scientist at Agilent, focused on developing analytical methods for trace contaminants on LC-MS/MS and LC-Q/TOF in environmental and food matrices. Tarun has a strong history of working in the environmental testing industry, with a background in technical and applied science, with experience in water treatment, environmental monitoring, and advanced analytical chemistry.

Prior to joining Agilent, Tarun graduated with a Ph.D. in Chemical & Environmental Engineering from the University of Arizona with a focus on water treatment strategies for water reuse and identification of emerging contaminants in the environment.

Tarun has an MS in Civil & Environmental Engineering from Carnegie Mellon University and a BS in Chemical Engineering.
