

# HIGH CAPACITY ROTARY VANE PUMPS AND ROOTS PUMPING SYSTEMS

- 2-3 MS-Series Rotary Vane Pumps
- 4-5 RPS-Series Roots Pumping Systems
- 6-7 Typical Applications
- 8-20 Pump Models

Agilent Technologies

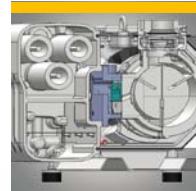

# MS-SERIES ROTARY VANE PUMPS FEATURES AND BENEFITS

## Agilent: a complete solution provider for the industrial vacuum equipment

Agilent MS-Series high capacity mono stage oil lubricated rotary vane pumps, from 95 to 680 m<sup>3</sup>/h.

- MS-Series pumps are robust, easy to install, and are ideal for use in many different applications
- Because of their compact size, MS-Series pumps can easily replace other pumps of equivalent pumping speed

## Industry leading vacuum performance; more than 20,000 RV pumps in operation!

### Shorter Cycle Times

- Smooth continuous operation, from atmospheric to base pressure
- High pumping speed even at low pressure

### Highly Robust for Stringent Applications

- Steel rotor
- Cast iron stator and cover
- Special design carbon fiber vanes
- Viton seals
- Gas ballast valve, for pumping high water vapor content
- Anti-suckback isolation inlet valve eliminates oil backstreaming and holds vacuum in case of power loss

### Environmentally Friendly

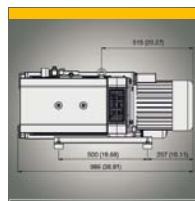

- A demister system limits oil exhaust over the entire range of working pressures
- Floating valve for oil recovery

# HIGH CAPACITY MS-RPS SERIES

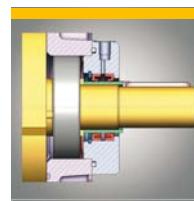

## Industry Leading Vacuum Performance

- Pump design allows lowest base partial pressure:  $8 \times 10^{-2}$  mbar ( $6 \times 10^{-2}$  Torr)

## Compact and Easy to Install

- Air cooling
  - cover design optimizes cooling air channels
  - integrated heat exchanger carries excess heat away
- Smaller than pumps of equivalent pumping speed

## Highly Reliable

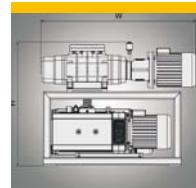

- Highly efficient oil circulation system ensures perfect lubrication and sealing in all critical areas of the pump
- Low noise and vibration

# RPS-SERIES ROOTS PUMPS & PUMPING SYSTEMS (FEATURES AND BENEFITS)

## RP-Series Roots Pumps

State-of-the-art, high performance Agilent Roots Pumps are ideal for use in demanding industrial applications.

### Compact and Easy to Use

- Agilent Roots Pumps are simple to use and to install
- Air cooling

## RPS-Series Roots Pumping Systems

Agilent's RPS Systems combine the ruggedness and reliability of High Capacity MS-Series RVPs with wide range Roots Pumps.

**More than 15,000 Roots Pumps in Operation!**

### Designed for Optimum System Integration

- Ideal combination for roughing down and backing Diffusion Pumps, Turbomolecular Pumps, and other HV pumps
- Optional electronics for continuous operation and monitoring of Vacuum Systems

### Clean

Ideal for use in applications demanding the highest levels of cleanliness:

- Special labyrinth seal prevents contamination
- A high capacity trap chamber captures condensation

### VFD Roots

- Inverter driven Roots to improve performance and minimize power consumption
- Constant performance at different input frequencies

# HIGH CAPACITY MS-RPS SERIES

## High Performance Roots Pumps

- Agilent Roots Pumps can withstand high mechanical loads reducing pumpdown cycles
- Lowest base pressure:  $5 \times 10^{-3}$  mbar ( $4 \times 10^{-3}$  Torr)

## Rugged and Reliable

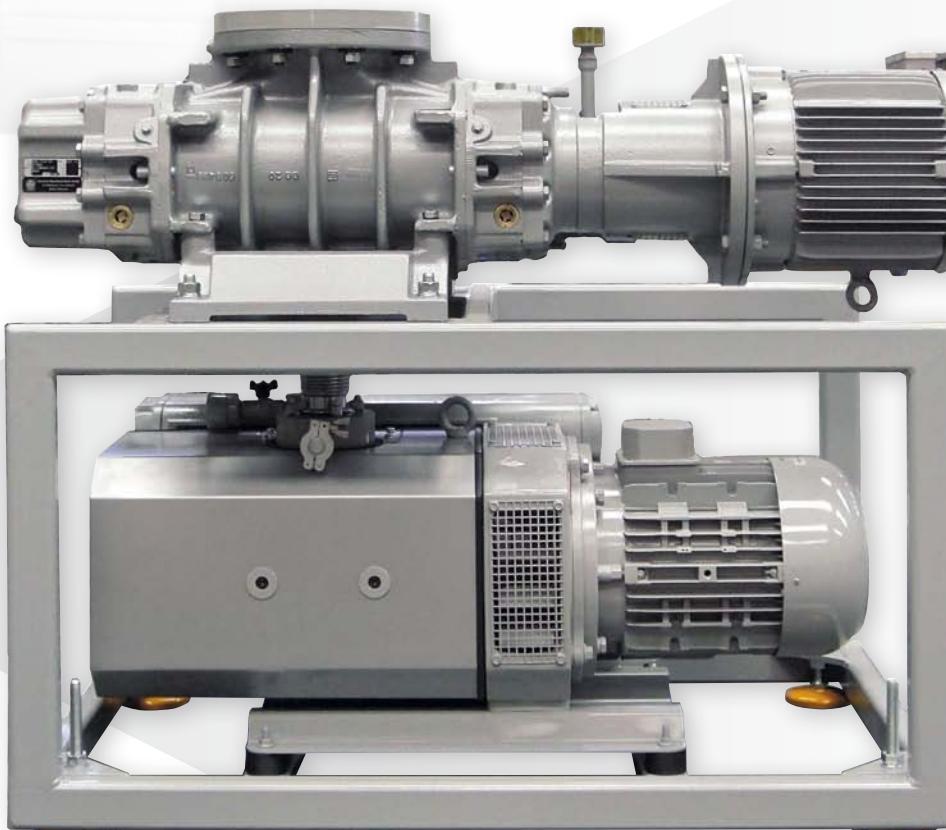

- Low noise and vibration, thanks to dynamically balanced rotors and precision ground gears
- Long maintenance intervals
- Air cooling

## Popular Sizes Available

- Combining MS-Series RVPs (from 95 to 680 m<sup>3</sup>/h) and Roots Pumps (from 250 to 4000 m<sup>3</sup>/h) allows tailored solutions optimizing performances, cost and power consumption

Other combinations are available on request.

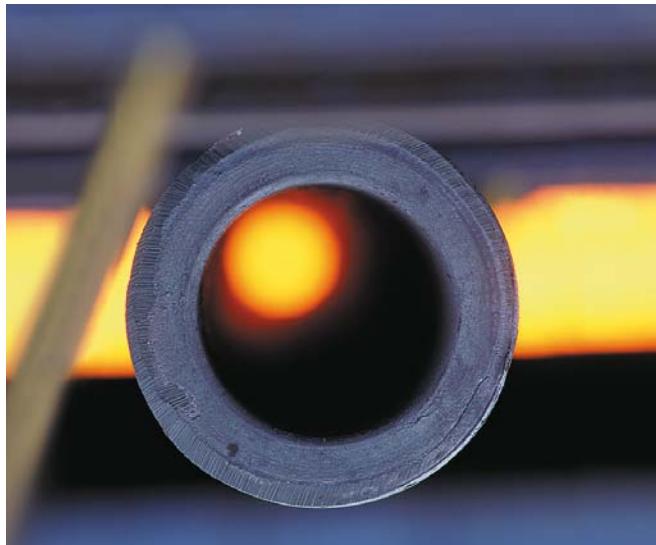

## TYPICAL APPLICATIONS

### Roughing and Backing High Vacuum Pumps

The new MS Pumps and RPS Systems are ideally suited for use in combination with Turbomolecular and Diffusion pumps or with HV pumps of any other manufacturer.

**Agilent is a leading solution provider for the industrial high and medium vacuum marketplace.**

### Vacuum Coating Systems

The most common application where the RPS are used are coaters of different dimensions, from small ones used in research fields to the very large ones used in industrial applications, including for instance glass coaters or coaters where large automotive or aircraft parts are treated. The ability to offer large RV pumps, up to 680 m<sup>3</sup>/h and Roots pumps up to 4000 m<sup>3</sup>/h make the Agilent offer in this range particularly interesting and able to satisfy different needs.

### Metallurgy and Heat Treatment

In this field Agilent has offered so far a very large number of Diffusion pumps, with sizes ranging up to 35,000 l/s. The availability now to provide the full vacuum system up to the atmospheric pressure is rapidly bringing this offer to satisfy most of the users, who are particularly interested in rapid cycle times and the excellent overall reliability of the Agilent solution.

# HIGH CAPACITY MS-RPS SERIES

High Capacity  
MS-RPS Pumps

## Helium Leak Detection

When large volumes or short cycle times are required for a process involving leak detection, typically but not only using helium, the Agilent RV pumps alone or in combination with the Roots pumps are an ideal solution to reach the parameters necessary for industrial applications. Agilent is well aware of technical aspects of this technology having been a pioneer in leak detection for several decades.

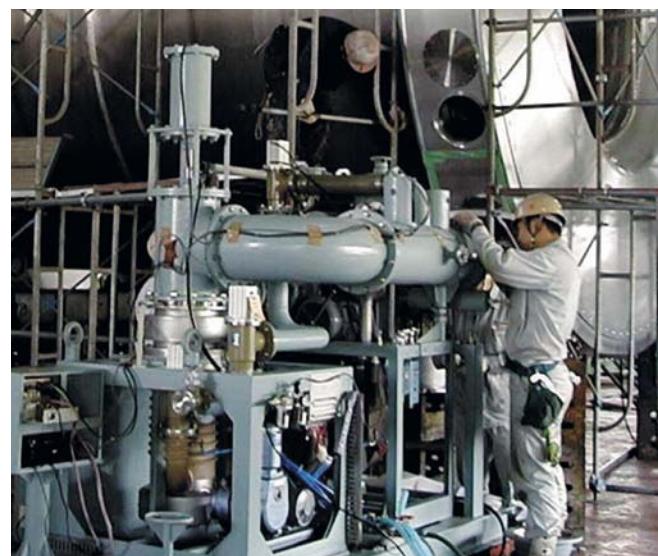

## LNG

Liquefied Natural Gas (LNG) is natural gas converted to liquid form for ease of storage or transport. LNG must be kept cold to remain a liquid, independent of pressure. For this reason it must be stored in vacuum-jacketed, cryogenic tanks pressure vessels. These tanks may be at pressures anywhere from less than 50 kPa to over 1,700 kPa (7 psig to 250 psig).

Agilent Roots Pumping Systems, in combination with Agilent Diffusion Pumps, are ideal to create vacuum in the annular space of the cryogenic tanks.

## Electron Beam Welding

EBW equipment requires the use of both High Vacuum Pumps, during generation and running of the welding beam, and Medium Vacuum Pumps for the rest of the process taking place in the chamber where the parts to be welded are positioned. Thanks to the introduction of the new Roots Pumping Systems, today Agilent is in a position to offer the entire vacuum system, as a single supply source in this important industry.

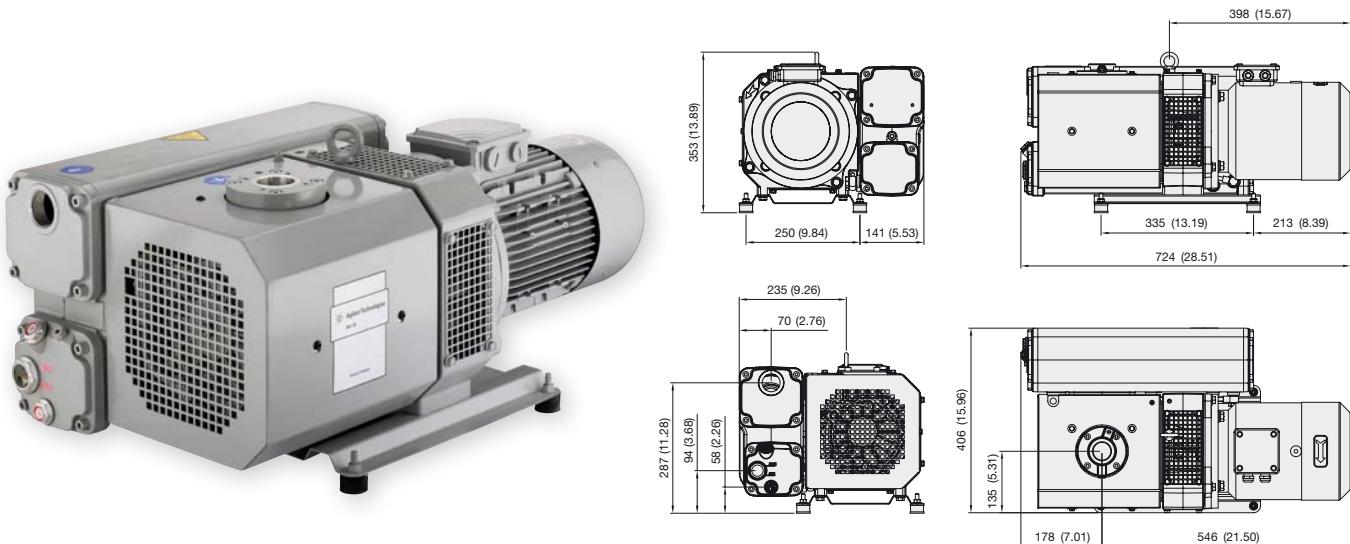

## Other Industrial Applications

Agilent RV pumps and Roots Systems are suitable for use in many other applications, including lamps manufacturing, vacuum drying and degassing, gas recovery, packing industry, chemistry and process technology, PET processing, pharmaceutical industry, vacuum distillation, cryogenic vessel evacuation, and many others.

## PUMP MODELS

### ► Agilent MS-631 FL (Frameless)

The Agilent MS-631 Frameless (FL) is a high capacity, single stage, oil lubricated rotary vane pump, that can be directly coupled to an Agilent Roots Pump (up to RP-3001 size) without the need of a frame.

The Roots Pump can be mounted directly on the MS-631 FL,

through an appropriate flange that can sustain the weight of the Roots Pump. The Roots Pump can be ordered separately. Please contact Agilent for technical specifications and ordering information.

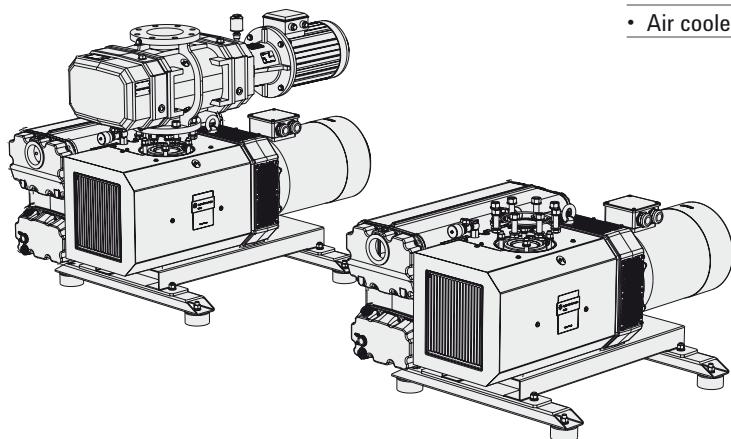

The two pumps are shipped separately.

#### Applications

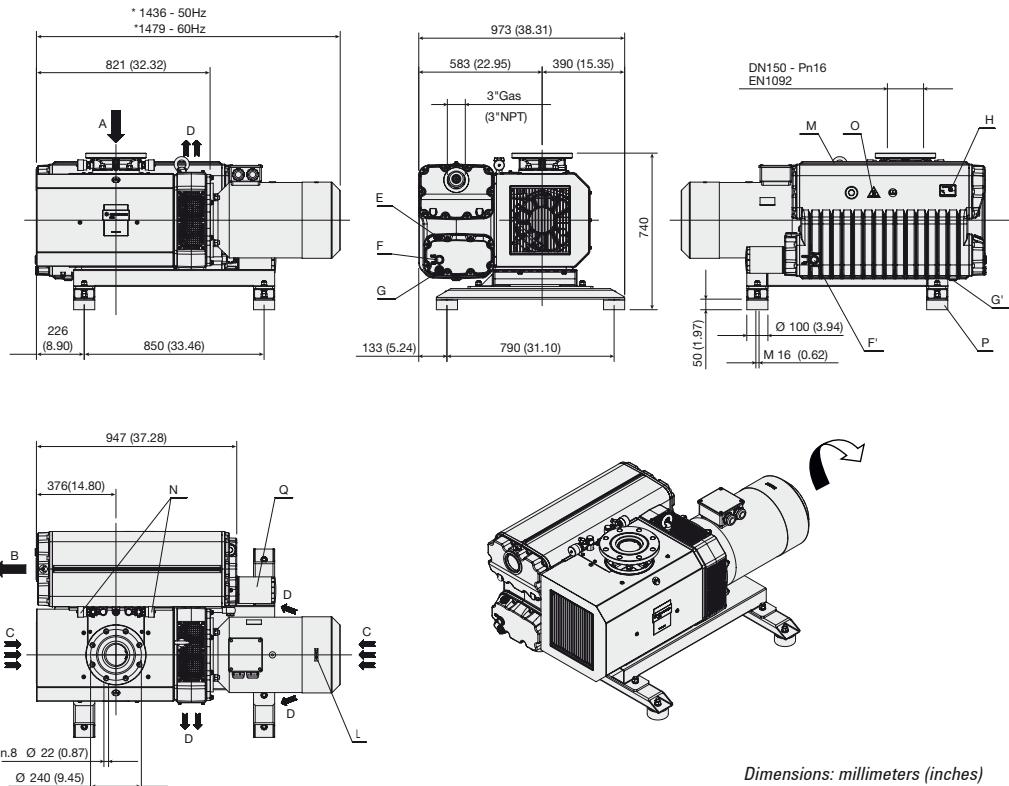

The rugged design, high performance and reliability, and compact size make the MS-631 FL ideal for demanding industrial applications such as thin film coatings, vacuum metallurgy, helium leak detection, and electron beam welding.

#### Key pump features

- Minimum footprint
- Easy to service
- Oil recirculation system
- Anti-suckback valve prevents system contamination
- Floating oil recovery valve
- Oil-level sight-glass allows quick visual check of pump status
- Carbon composite vanes extend pump life
- Air cooled

### Technical Specifications

<b>Nominal speed*</b>	2045 m³/h (at 50 Hz) 2444 m³/h (at 60 Hz)
<b>Ultimate total pressure</b> (with gas ballast valve closed)* (absolute)	$\leq 7 \times 10^{-3}$ mbar ( $\leq 7 \times 10^{-1}$ Pascal)
<b>Ultimate total pressure</b> (with gas ballast valve open)* (absolute)	$\leq 2 \times 10^{-2}$ mbar ( $\leq 2$ Pascal)
<b>Start up pressure RP2001</b> (absolute)	$\leq 80$ mbar ( $\leq 60$ Torr)
<b>Fitted motor power** (MS + RP)</b>	15 + 7.5 (400 V) kW at 50 Hz 18.5 + 7.5 (460 V) kW at 50 Hz
<b>Noise pressure level***</b>	77 dB(A) at 50 Hz 78 dB(A) at 60 Hz
<b>Oil capacity (MS + RP) nominal</b>	22 + 2.5 l
<b>Weight</b> with 3 ph 50 Hz motor with 3 ph 60 Hz motor	920 (2026.48) kg (lb) 986 (2171.85) kg (lb)

\* According to PNEUROP standard 6602

\*\* Valid for temperatures up to 40 °C and altitudes lower than 1000 m

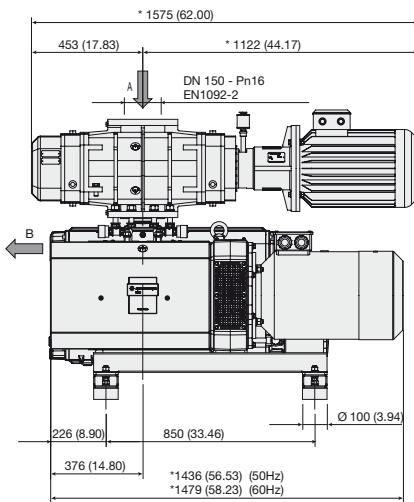

\*\*\* According to UNI EN ISO 2151 standard

## RPS-3001 / MS-631 FL System

### RPS-3001 / MS-631 FL - Pumping Speed

Dimensions: millimeters (inches)

### Technical Specifications

<b>Nominal speed*</b>	2890 m <sup>3</sup> /h (at 50 Hz) 3465 m <sup>3</sup> /h (at 60 Hz)
<b>Ultimate total pressure</b> (with gas ballast valve closed)* (absolute)	$\leq 7 \times 10^{-3}$ mbar ( $\leq 7 \times 10^{-1}$ Pascal)
<b>Ultimate total pressure</b> (with gas ballast valve open)* (absolute)	$\leq 2 \times 10^{-2}$ mbar ( $\leq 2$ Pascal)
<b>Start up pressure RP3001</b> (absolute)	< 36 mbar (< 27 Torr)
<b>Fitted motor power** (MS + RP)</b>	15 + 11 (400 V) kW at 50 Hz 18.5 + 11 (460 V) kW at 50 Hz
<b>Noise pressure level***</b>	77.5 dB(A) at 50 Hz 78.5 dB(A) at 60 Hz
<b>Oil capacity (MS + RP) nominal</b>	22 + 2.5 l
<b>Weight</b>	
with 3 ph 50 Hz motor	1052 (2317.23) kg (lb)
with 3 ph 60 Hz motor	1140 (2511.07) kg (lb)

\* According to PNEUROP standard 6602

\*\* Valid for temperatures up to 40 °C and altitudes lower than 1000 m

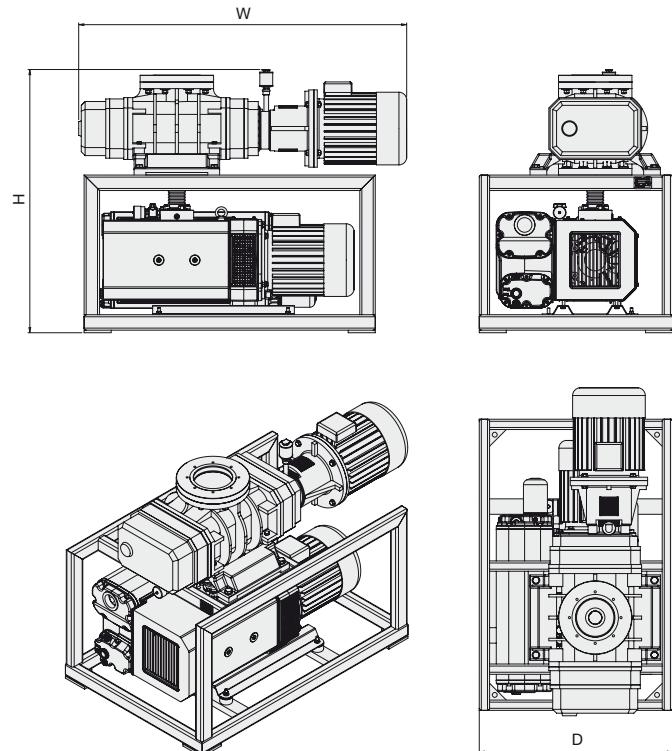

\*\*\* According to UNI EN ISO 2151 standard

## RPS PUMPING SYSTEMS MODELS

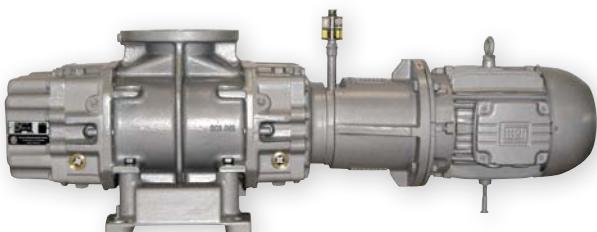

### ► Agilent RPS-Series Roots Pumping Systems

Roots Pumping Systems (RPS) consist of one MS Rotary Vane Pump and one RP Roots Pump, assembled on a dedicated frame, and connected in series with a flexible hose. This assembly is shipped with the pumps mounted on the frame and leak checked. Both pumps are equipped with motor.

*Photo and Outline Drawing: RPS-1401/301*

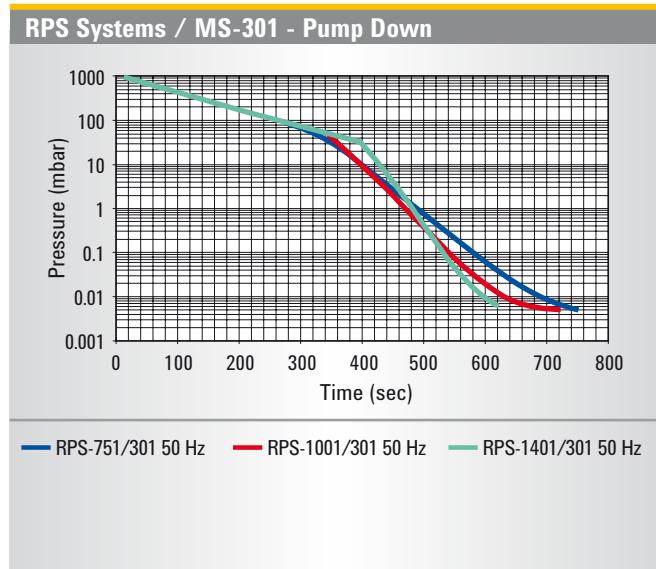

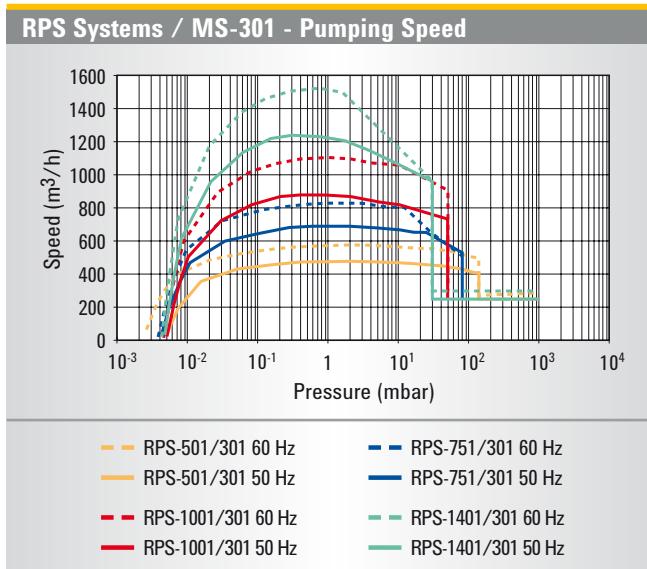

### ► Agilent RP-Series Roots Pumps

State-of-the-art, high performance Agilent Roots Pumps are ideal for use in demanding industrial applications:

- Highest compression ratio
- Agilent Roots Pumps can withstand high mechanical loads reducing pumpdown cycles
- Lowest base pressure:  $5 \times 10^{-3}$  mbar ( $4 \times 10^{-3}$  Torr)
