

What Could Your Lab Do with 1,250 More Hours?

Calculating the cost of manual pipetting:

25 hours per week

4% error rate

\$100 per hour

***\$124,800/year**

*Not including sample costs. Provided estimates are approximate and actual savings are dependent on application used.

Save time and money with the Agilent Bravo system

Automated workflows

Reducing manual steps allows for increased sample throughput and reproducible sample preparation for improved downstream analysis and statistical significance.

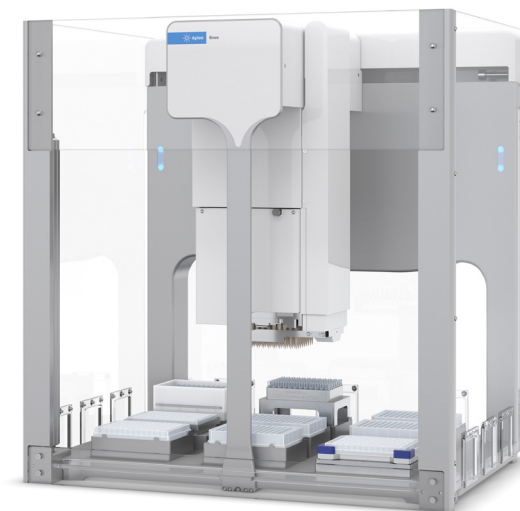

Free up time

Let the Bravo do the heavy lifting of repetitive pipetting and free yourself to address more value-added tasks such as data analysis and project execution.

Reduce errors

Hours spent on manual sample preparation often leads to pipetting errors and sample reruns which can be overcome by a Bravo automated solution.

Calculate how much your lab could save.
