

Guaranteed Peace-of-Mind

Agilent Certified Pre-Owned Instruments Value Promise

Why take risks with third-party resellers?

Agilent Certified Pre-Owned Instruments deliver uncompromising quality at a price you can afford. Every system is factory refurbished using the same rigorous processes, parts, and testing as our new instruments.

We stand behind our Certified Pre-Owned Instruments with three years total of guaranteed usable life from purchase for instruments at or past the end of guaranteed support date, including a 12-month same-as-new warranty. Otherwise, we will credit the residual value of the system toward your purchase of a replacement model.

Here's a real-world example:

A customer purchased an Agilent Certified Pre-Owned 1200 HPLC value bundle in August 2022. The instrument they purchased was first introduced in 2006 and reached end of production in 2010. Even though the end of guaranteed support for this instrument was 2018, the customer still received three years of usable life guarantee for the purchase of this certified pre-owned instrument.

The difference is in the details

Agilent Certified Pre-Owned Instruments are refurbished in the same factory as new instruments—and are performance-certified to the same specifications as new.
