

Choose Value. Choose Reliability. Choose Agilent.

Agilent InfinityLab LC Series instruments
are now within your reach

Lower pricing is just the beginning

Need efficient LC technology that keeps repair costs and downtime to a minimum? Want to be part of a group of chemists who benefit from insights that optimize lab operations? There's never been a better time to choose Agilent.

That's because we're offering special pricing on the instruments you need to stay competitive—including customizable LC options to meet specific requirements. And that's only part of the story. You'll also be joining a community of scientists who have access to:

- Training and services to get your new LC up and running smoothly
- Worldwide expert technical support
- Analytical standards that guarantee precise analysis

So don't wait. Take advantage of special offers that help your lab reach its full potential and stay ahead of the competition.

More than just an instrument—an investment in your lab

Total cost of ownership is about more than upfront costs. It's also about service repair costs and downtime. Agilent InfinityLab LC Series instruments have a reputation for reliability, efficiency, and uptime, so you can maximize your return on investment.

High-quality results at an affordable price: Agilent 1220 Infinity II LC

Benefit from maximum return on investment and lowest cost of ownership.

- Optimized for everyday productivity
- Fully compliant with regulatory LC application requirements
- Industry-leading quality and long-life
- Fast, trouble-free startup

A flexible choice for operational efficiency: Agilent 1260 Infinity II LC

Reliable instrumentation combines with column innovation and advanced supplies to guarantee robust separation and detection performance.

- Compatible with conventional and ultrahigh-performance LC
- Fast, precise gradients
- Lower carryover
- Reduced cycle times

The next generation of LC: Agilent 1290 Infinity II LC

The 1290 Infinity II LC delivers unmatched separation and detection performance for ultimate confidence in your results.

- More chromatographic resolution
- Higher peak capacity for challenging separations
- Ultralow carryover for uncompromised data quality
- Faster injection cycles with dual-needle injection
